

Improved Practice Management

The Superbill feature performs an entire chart audit informing the provider exactly what a patient qualifies for, what they are going to charge, what a specific insurance will pay, & what they need to perform to code to the next level.

iMedicWare

Coding Made Easy

Everything is automated! ICD-10 diagnosis codes, claim modifiers, and even PQRS are all taken care of for the physicians. Less confusion, less stress, and higher reimbursement!

Track patient & staff movement within the office to improve practice efficiency while decreasing the patient's wait time using the

iMedicMonitor

Less Documentation, More Quality Patient Care

Our Patient at a Glance feature assures a physician never walks into the room cold. Every single visit is displayed on one screen.

Subspecialty Specific

Built-in tools designed specifically for all Ophthalmic subspecialties, including Retina, Glaucoma & Refractive.

**A
Total
Practice
Solution**

Enhanced Information Sharing

Automatic delivery of information to other providers so you can build a secure network of patient records

Reduced Redundancy

Rejections & denials are reduced tremendously with claims being scrubbed multiple times

Lessen Administrative Tasks

Processes like reviewing payments & submitting claims are made easier without having to bridge to a third party
